

Aluminum Floating Bridge

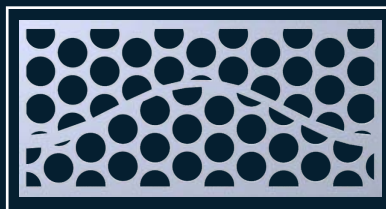

Innovative floating solutions

Light freeboard: 700 mm
Length: 11 m
Clear width: 3 m
Railing: 1,400 mm
Floatability reserve: 2.3 KPa

Extruded aluminum flooring

Structural anti-slip bridge 4.8 KPa. No upkeep required, with a service life of at least 50 years.

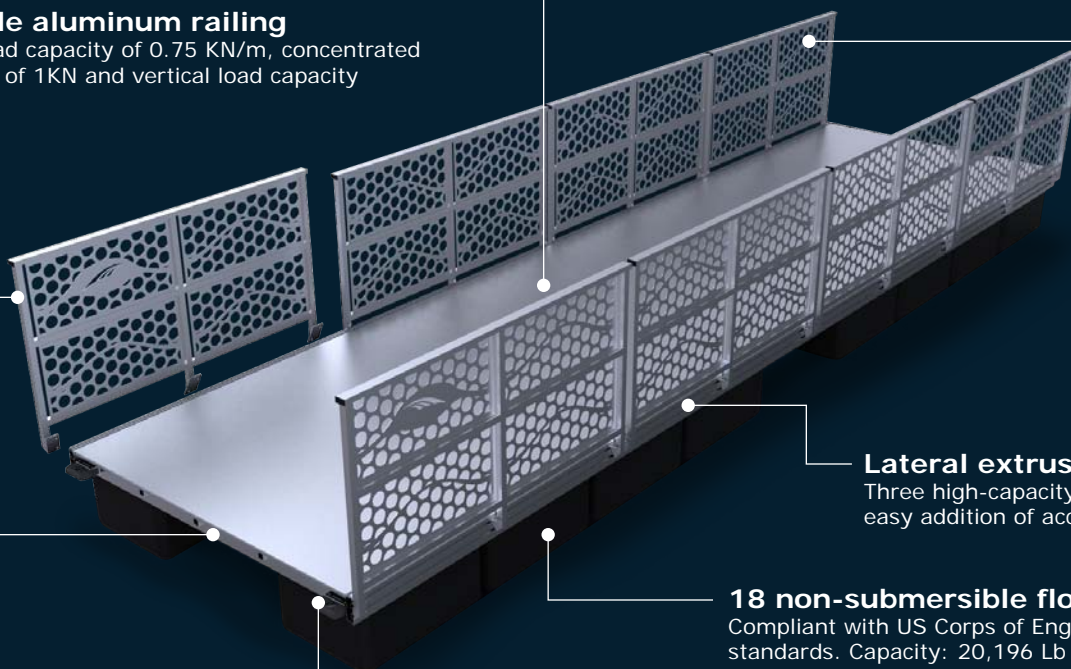

Railing design

Custom-tailored to your project

Removable aluminum railing

Horizontal load capacity of 0.75 KN/m, concentrated load capacity of 1KN and vertical load capacity of 1.5 KN.

Lateral extrusion

Three high-capacity sliders permitting easy addition of accessories

Structure

Compliant with CSA S157-05

18 non-submersible floaters

Compliant with US Corps of Engineers & Hunt Test standards. Capacity: 20,196 Lb

MAADI cushioning gaskets

Reinforced neoprene 5 tonnes
