

# ALUMINUM CASTINGS

## *Delivering creative engineering and manufacturing solutions*

**MAADI** Group engineers are experts in aluminum casting technologies. We offer a complete range of aluminum casting design capabilities, from basic low-cost projects to complex designs that require extremely tight tolerances and demanding metallurgical specifications. MAADI engineers rise to every challenge, delivering creative engineering and manufacturing solutions, even when urgent turnaround times or the most intricate die geometries are required.

Achieving consistent, high-quality aluminum castings using precision 3-D numeric modeling and finite element analysis is a mission we take very seriously. Our team devotes a wealth of knowledge and experience in aluminum casting design to our ultimate goal: supplying you with premier-grade finished parts. Our professional engineers implement design methods that are the basis for the best aluminum castings possible. Great castings help you achieve your best product and succeed in today's competitive marketplace.
