

# VARIOUS ALUMINUM STRUCTURES

## *Delivering creative engineering and manufacturing solutions*

MAADI Group's engineering team uses our skilled expertise in aluminum fabrication, assembly and welding practices to design durable aluminum structures for customers, manufacturers and fabricators alike. Practical and ingenious designs for ladders, bleachers, fire escapes, scaffolding and more are given our full technical support from initial design to product assembly and installation. From drawing and calculation to pre-certification and finished aluminum product shipment, MAADI engineers treat every job with the dedication and precision our clients deserve, while satisfying the most stringent industry standards.
